#### PLANT-FOREST TREE SEEDLINGS FOR PROFIT SHADE AND BEAUTY

No farm should be without a grove of Forest Trees. The expense is very small, it pays well in shade and timber, and may means a good estate for your children in years to come.

Your farm will always need fences. Your fences will always need posts. The Black or Yellow Locust grows the best of posts quickly.

Grow a Black Walnut Orchard on your farm. The trees will produce the finest, the most valuable timber, and at the same time yield quantities of the richest nuts, which are sold in abundance at good prices. When you want lumber for your buildings you will find nothing better than the Tulip (Yellow) Poplar. You perhaps have idle waste land on your farm that will grow a few trees, which will make the land rich and yield you a profit at the same time.

Place your order new while the stock is plentiful, shipment to be made any time you wish. We have this year larger assortment, better storage and packing sheds, and a strong desire to please you, and hope that you may let us supply your wants in this line.
